Details:

AI Summary

Buying a garage door and opener separately might seem flexible, but it's actually one of the most expensive decisions Australian homeowners make during a build or renovation. When you purchase a B&D; garage door and opener together as a matched package, you unlock the ****10-Year Total Confidence Warranty**** — double the coverage you'd receive buying components individually. You also benefit from a single installation visit (saving hundreds in labour), factory-matched compatibility (no guesswork about which opener suits which door), and a system that's been engineered to work together from day one.

This guide breaks down five B&D; door-and-opener bundles — from the budget-friendly Rollmasta + Power Drive through to the premium Panelift Icon + Controll-A-Door Smart Pro — so you can find the combination that fits your home, your lifestyle, and your budget. Every bundle listed here is 100% B&D;, backed by Australian engineering, and eligible for the warranty upgrade that makes buying together the smartest move you'll make.

The #1 Reason to Bundle: 10-Year Total Confidence Warranty

Here's the single biggest reason to buy your B&D; door and opener as a package: ****warranty****.

When you purchase a B&D; garage door and a B&D; opener separately, each component carries its own individual warranty — typically ****5 years or 10,000 cycles**** on major components for the opener (when installed by an Approved B&D; Dealer), and a standard product warranty on the door. Ancillary components are covered for just 12 months.

But when you buy a ****pure B&D; door and opener system together**** and register online, you unlock the ****10-Year Total Confidence Warranty****. That's a decade of coverage on your complete system — the door, the opener, and all the mechanical and electronic components that make them work together.

Think about what that means in real terms:

- ****Buy separately:**** Your opener warranty expires at year 5. If the motor fails in year 6, you're paying full price for parts and labour. - ****Buy together:**** That same motor failure in year 6 is covered. Parts, labour, sorted.

The warranty conditions are straightforward: - The system must be installed by B&D; or an Approved Distributor - You need to follow the manufacturer's care and maintenance recommendations - Annual door servicing is required to maintain coverage - You must register online after installation

That's it. No hidden catches. Just a genuine incentive from B&D; to reward customers who choose a complete, matched system.

For most homeowners, the warranty upgrade alone saves more than enough to justify buying together rather than mixing and matching components over time.

Bundle 1: Budget — Rollmasta + Power Drive

****Best for:**** Investment properties, basic garages, sheds, and homeowners who want reliable automation without the premium price tag.

What You Get

****The Door — Rollmasta (Model R1R)**** The Rollmasta is B&D;'s entry-level roller door, part of the Series 1 Roll-A-Door family. Don't let "entry-level" fool you — this is still a B&D; product built to Australian standards:

- ****Material:**** COLORBOND steel construction
- ****Weatherseal:**** Included as standard on the aluminium T-section bottom rail
- ****Locking:**** Shoot bolt external bottom rail lock
- ****Operation:**** Chain-gear manual operation (converted to automatic with the Power Drive)
- ****Max door area:**** Approximately 16.5m²
- ****Installation:**** Behind-opening mounting, minimum 120mm sideroom, 250mm headroom

****The Opener — Power Drive**** The Power Drive is B&D;'s workhorse rolling door opener. It's purpose-built for roller doors and delivers smooth, reliable automation:

- ****Remote controls:**** Included with Code Hopping technology for security
- ****Code storage:**** Up to 64 remote transmitters
- ****Manual disengagement:**** Pull-cord release for power failure operation
- ****Re-engagement:**** Simple manual process to reconnect after power returns
- ****LED indicators:**** Status lights for open, close, coding, and service alerts

Who Should Choose This Bundle

This is the bundle for homeowners who need a functional, automated garage door without bells and whistles. If you're building a rental property, fitting out a shed, or replacing an old manual door on a budget, the Rollmasta + Power Drive delivers exactly what you need — and nothing you don't.

****Approximate installed cost:**** From around \$1,100–\$1,500 depending on door size and location.

Bundle 2: Most Popular — Roll-A-Door + Power Drive

****Best for:**** The majority of Australian homes. This is the combination that's been trusted on millions of garages across the country.

What You Get

****The Door — Roll-A-Door (Series 2 or Series 3)**** The Roll-A-Door is quite possibly Australia's most recognised garage door. Available in Series 2 and Series 3 configurations, it offers a significant step up from the Rollmasta in material quality, wind resistance, and longevity:

- ****Material:**** 0.4mm or 0.50mm BMT COLORBOND ZALG300S2 steel
- ****Profile:**** Curved rib/pan profile with precise rib spacing (77mm centres for Series 2, 84mm for Series 3)
- ****Edge**

reinforcement:** Flat G550 Z275 Hi-Ten steel strip, 38mm wide, 0.55mm thick - **Guides:** 4mm thick aluminium extrusion, 122mm wide × 52mm high, fixed with M10 bolts at 150mm centres - **Windlock technology:** Steel clips at every flat providing 9mm pull-in to guide for enhanced wind resistance - **Max width:** Up to 5,500mm (Series 2) or 5,100mm (Series 3) - **Wind ratings:** Up to 3.04 kPa outward / 2.92 kPa inward (Series 2, 5,500mm, 0.5mm) - **Bottom rail:** Aluminium T-section with weatherseal included - **Locking:** Steel locking bars with covers and retainers - **Slat options:** Solid, Slotted 19×101mm (13% opening), or Slotted 32mm Round (14.5% opening)

****The Opener — Power Drive**** Same reliable Power Drive as Bundle 1, purpose-matched to the Roll-A-Door:

- Code Hopping security across up to 64 transmitters - Manual disengagement and re-engagement for power failures - LED status indicators - Smooth, quiet rolling door automation

Who Should Choose This Bundle

If you're building a new home or replacing an ageing garage door, this is the default choice for good reason. The Roll-A-Door's Windlock technology makes it suitable for exposed and coastal areas, the COLORBOND colour range matches virtually any façade, and the Power Drive delivers fuss-free daily automation. It's the combination that B&D; dealers recommend more than any other.

****Approximate installed cost:**** From around \$1,500–\$2,200 depending on series, size, and colour selection.

Bundle 3: Mid-Range — Panelift + Controll-A-Door Secure

****Best for:**** Homeowners who want a sectional door with superior security features, a quieter operation, and a modern panel aesthetic.

What You Get

****The Door — Panelift (PFT)**** The Panelift is B&D;'s core sectional garage door, offering the clean panel look that's become standard on modern Australian homes:

- **Spring system:** Tension spring designed to AS standards for 20,000 cycles - **Minimum headroom:** Just 57mm — ideal for garages with limited ceiling clearance - **Sideroom:** 95mm standard, 195mm with Auto-lock - **Backroom:** Panel height + 350mm recommended (minimum panel height + 100mm) - **Installation:** Professional installation recommended with specialised tool kit - **Panel reinforcing:** Available for doors wider than 3,545mm - **Level mounting:** Precision-levelled behind the opening for smooth, even operation

****The Opener — Controll-A-Door Secure**** The Controll-A-Door Secure is where B&D;'s engineering really starts to shine. This opener is packed with features that justify every dollar:

- **Motor:** 250W (1/3 HP) AC motor - **Max door specs:** 5,500mm wide × 3,000mm high, 16.5m² area, 100kg weight - **Code Hopping Technology:** Over 4.29 billion possible code combinations — eliminates code grabbing - **Tri-Tran Frequency Hopping:** Signals across three frequencies simultaneously, reducing interference - **Safety Reversing System:** Automatic reversal on obstruction detection, with adjustable force for windy conditions - **LED Courtesy Light:** Brilliant white LED, auto-on for ~4 minutes during operation, can be triggered from transmitter - **Self-Locking:** Door positively locks when closed — no manual locking needed - **Soft Start/Soft Stop:** Smooth acceleration and deceleration for reduced wear and quieter operation - **Dynamic Door Profiling:** Opener learns and adapts to changing door characteristics with every cycle - **Auto-Close:** Programmable 30-second auto-close (requires Safety Beams) - **Pet Mode:** Partial door opening for pet access, adjustable height - **Vacation Mode:** Disables radio receiver from a transmitter for extended absence - **Memory Retention:** Transmitter codes and limits survive power failures -

****Manual Release:**** Hand-operated handle for power failure use - ****Receiver capacity:**** 14 × 4-button transmitter codes - ****Minimum headroom:**** Just 50mm - ****Warranty:**** 5 years / 10,000 cycles on motor, electronics, and mechanical components (individual); ****10 years with door bundle and online registration****

Who Should Choose This Bundle

This is the sweet spot for homeowners who want more than basic automation. The Controll-A-Door Secure's self-locking, soft start/stop, and Dynamic Door Profiling make daily use noticeably smoother and quieter than budget openers. If security matters to you — and it should — the 4.29 billion code combinations and Tri-Tran frequency hopping put this opener in a different league. The Panelift door completes the package with a clean, modern aesthetic that suits everything from brick veneers to rendered contemporary homes.

****Approximate installed cost:**** From around \$2,200–\$3,000 depending on door size, panel style, and colour.

Bundle 4: Smart Home — Panelift + Controll-A-Door Smart

****Best for:**** Tech-savvy homeowners who want smartphone control, real-time notifications, and the ability to manage their garage from anywhere.

What You Get

****The Door — Panelift (PFT)**** Same excellent Panelift sectional door as Bundle 3, with its 20,000-cycle spring system, minimal headroom requirements, and clean panel aesthetic.

****The Opener — Controll-A-Door Smart**** The Controll-A-Door Smart includes everything from the Secure model, plus full smartphone integration via the B&D; Smart Phone Control Kit:

- ****All Secure features included:**** Code Hopping, Tri-Tran, Safety Reversing, Self-Locking, Soft Start/Stop, Dynamic Door Profiling, LED courtesy light, Pet Mode, Vacation Mode, Auto-Close - ****TrioCode™128 Encryption:**** Patented security technology prevents code grabbing and wireless interference - ****B&D; App Control:**** Open, close, and monitor your garage door from your smartphone — at home or anywhere in the world - ****Real-Time Alerts:**** Instant notifications if the door is left open or encounters an obstruction - ****Activity Logging:**** Complete history of every door operation - ****Multi-User Access:**** Add family members, tradespeople, or cleaners with individual passwords and varying access levels - ****Multi-Location Management:**** Control multiple doors or gates across different locations from one app - ****Access Scheduling:**** Grant scheduled access to trusted individuals - ****Temporary Access Codes:**** One-time codes for tradespeople — electrician coming at 2pm? Send them a code that works once - ****WiFi Connected:**** Operates via your home WiFi network with guided app setup

Who Should Choose This Bundle

If you've ever driven 20 minutes back home because you couldn't remember if you closed the garage, this bundle pays for itself in peace of mind. The smartphone control transforms your garage door from a dumb mechanical device into a connected part of your home. Real-time alerts mean you'll never leave it open overnight again, and temporary access codes are a game-changer for anyone who regularly has tradespeople visiting the property. The B&D; App is available on both iOS and Android and can be tried in demo mode before installation.

****Approximate installed cost:**** From around \$2,500–\$3,500 depending on door size and configuration.

Bundle 5: Premium — Panelift Icon + Controll-A-Door Smart Pro

****Best for:**** Homeowners building premium homes who want the best door, the best opener, and the full suite of smart and security features.

What You Get

****The Door — Panelift Icon (PFI)**** The Panelift Icon is B&D's premium sectional garage door, designed for homes where the garage door is a genuine architectural element:

- ****Premium panel design:**** Distinctive profile that elevates street presence - ****Auto-lock compatible:**** Purpose-designed for the Auto-Lock accessory - ****Jamb lintel seal and nylon bristle brush options:**** Superior weather sealing for a tighter, more finished installation - ****Full Panelift engineering:**** 20,000-cycle spring system, precision-levelled mounting, professional installation - ****Same minimal headroom:**** 57mm minimum, making it versatile across garage configurations

****The Opener — Controll-A-Door Smart Pro**** The flagship of the B&D; opener range. Everything from the Smart, plus premium upgrades:

- ****All Smart features included:**** App control, real-time alerts, activity logging, multi-user access, scheduling, temporary codes - ****TrioCode™128 Encryption:**** Patented security technology - ****600N Motor:**** Higher-powered motor with a ****7-year motor warranty**** - ****2 Premium Remote Controls:**** Included in the box - ****64 Transmitter Capacity:**** Store codes for up to 64 four-button transmitters - ****Battery Backup Capability:**** Optional battery backup keeps the door operating during power outages — the system switches automatically, even mid-cycle - ****LED Courtesy Lighting with Dimming:**** Adjustable brightness for ambience and practicality - ****Safety Reversing:**** Automatic obstruction detection and reversal - ****Service Reminder Indicator:**** Alerts you when periodic maintenance is due - ****Supports up to 4 accessories:**** Auto-Lock, Wireless Safety Beams, Smart Hub, and Wireless Keypad simultaneously

Who Should Choose This Bundle

This is the no-compromise package. The Panelift Icon makes a statement on your home's façade, while the Smart Pro delivers the most powerful, most connected, and most feature-rich opener B&D; makes. The 600N motor handles larger, heavier doors with ease, and the battery backup capability means power outages don't leave your car trapped (or your home unsecured). If you're building a home where quality matters at every touchpoint, this is the bundle that matches the rest of your finishes.

****Approximate installed cost:**** From around \$3,500–\$5,000+ depending on door size, colour, and accessories selected.

Add-Ons That Complete Any Bundle

Every B&D; bundle can be enhanced with accessories that add safety, security, and convenience. Here are the four most popular:

Safety Beams Non-contact safety detection that prevents the door from closing when the beam is obstructed. ****Required by Australian Standards (AS/NZS 60335-2-95) if closing force exceeds 400N.**** Mandatory for Auto-Close mode. Install at 100mm above ground level (65mm from bottom of unit to floor), with the receiver in shade and transmitter in sun or shade. A must-have for any family home.

Battery Backup Keeps your opener running during power outages — the system switches over automatically, even if the door is mid-cycle. Takes up to 24 hours for full charge. Particularly recommended for bushfire-prone areas or regions with unreliable power supply. Available as standard capability on the Smart Pro, optional kit for other models.

Auto-Lock (GDL-200V2) Automatically slides a bolt into the guide track when the door closes, providing physical security beyond the opener's electronic lock. LED indicators show lock status (red = locked, green = unlocked). Runs on 2 × C-LR14 batteries with low-battery warning. ****Important:**** Do not install in garages with only one exit. The lock engages automatically after each full open/close cycle.

Wireless Keypad Enter a PIN code to operate the door without a remote — perfect for kids, regular visitors, or as a backup when remotes are misplaced. Backlit display for night use. Add and delete multiple users with individual PINs. Wireless installation means no complex wiring.

****Note:**** The opener can hold up to 4 accessories simultaneously. If installing both an Auto-Lock and Wireless Safety Beams, ensure the base station channels are set differently.

Why Buying Separately Costs More

Beyond the warranty advantage, there are practical financial reasons to bundle:

1. Installation Efficiency When a B&D; Approved Dealer installs your door and opener in a single visit, you pay for one call-out, one setup, and one calibration session. Buy the door now and add an opener later? That's two separate visits, two call-out fees, and the second installer has to work around whatever the first one did. Most dealers estimate you'll save ****\$200–\$400 in labour**** by bundling.

2. The Warranty Gap As covered above, individual component warranties top out at 5 years for major parts. The 10-Year Total Confidence Warranty effectively doubles your coverage at no additional product cost — you're simply buying them together and registering online. Over a 10-year period, a single motor replacement or spring repair can easily cost \$300–\$600. The warranty upgrade is worth thousands in potential savings.

3. Guaranteed Compatibility A B&D; door with a B&D; opener is a matched system. The opener's force settings, travel limits, and safety parameters are engineered for the specific door type. When you mix brands or buy at different times, you risk mismatched specifications — an opener that's too powerful for the door (causing premature wear) or too weak (causing stalling and unreliable operation).

4. Resale Value A fully documented B&D; system with a transferable warranty is a selling point when your home hits the market. Buyers notice the difference between a matched, warranted system and a cobbled-together setup with no paperwork.

FAQ

Can I add an opener to my existing B&D; door later and still get the 10-Year warranty? The 10-Year Total Confidence Warranty applies when a B&D; door and opener are purchased and installed together as a system, then registered online. Adding an opener to an existing door at a later date would typically be covered under the opener's individual warranty terms. Contact B&D; or your local Approved Dealer for specific eligibility.

Which opener works with roller doors and which works with sectional doors? The **Power Drive** (and Roll-A-Pro) are designed specifically for **roller doors** like the Rollmasta and Roll-A-Door. The **Controll-A-Door** range (Secure, Smart, Smart Pro) is designed for **sectional doors** like the Panelift and Panelift Icon. Don't cross-match them — each opener type is engineered for a specific door mechanism.

Do I need Safety Beams with every bundle? Safety Beams are **mandatory** under Australian Standards if the door's closing force exceeds 400N (40kg). They're also required if you want to use the Auto-Close feature on the Controll-A-Door range. Even where not strictly required, B&D; strongly recommends them for any home with children or pets. They're an inexpensive add-on that could prevent a serious injury.

Can I control my garage door from my phone with any of these bundles? Smartphone control is available with **Bundle 4 (Panelift + Smart)** and **Bundle 5 (Panelift Icon + Smart Pro)** out of the box. For other bundles, you may be able to add a Smart Phone Control Kit as an accessory — ask your B&D; dealer about compatibility with your specific opener model.

What happens during a power outage? All B&D; openers include a **manual release handle** that lets you operate the door by hand during power failures. The **Controll-A-Door Smart Pro** (Bundle 5) also supports an optional **Battery Backup** that automatically takes over — even mid-cycle — so you can continue using remote or app control without interruption. The battery charges from mains power and takes up to 24 hours for a full charge.

How long does installation take for a complete bundle? A typical single-door bundle installation by an Approved B&D; Dealer takes **2–4 hours** depending on the door type, opener model, and site conditions. Sectional doors (Panelift range) generally take slightly longer than roller doors due to the track and spring system setup. Your dealer will confirm timing when they quote.

Your Next Step

Ready to find the right bundle for your home? Here's how to get started:

1. **Get a free measure and quote** — Call **13 62 63** or visit [bnd.com.au](https://www.bnd.com.au) to book a free in-home consultation with your local B&D; Approved Dealer.
2. **Choose your bundle** — Your dealer will help you match the right door and opener combination to your garage dimensions, aesthetic preferences, and budget.
3. **Lock in your 10-Year Total Confidence Warranty** — Purchase your door and opener together, have them professionally installed, and register online. Done.

Every B&D; bundle is designed, engineered, and manufactured in Australia. Every installation is backed by trained professionals. And every matched system is eligible for the warranty that makes buying together the smartest decision you'll make for your garage.

****Call 13 62 63 today or visit your nearest B&D; Approved Dealer.****
